Hydroponic Nutrient Solution - The Essential Guide | Green ...

Hydroponics is a Greek term, made from two words - Hydro means water and Ponos means labor. And hence "working water" is its raw meaning. To put simply, Hydroponics is the method of growing plants without soils. Plants are grown in a soilless medium (we'll know about it below) and come into contact with the nutrients in the water for their growth.

Greek words for water (hydro) and work (ponos) - "working with water". In a hydroponic system plant roots do not grow in soil, but in nutrient-enriched water. Compared to the cultivation in soil, the plants get everything they need to grow through the nutrient solution, delivered directly to the roots.

Hydroponic: Hydroponics Guide

Introduction to Hydroponic seed germination Hydroponics is an ideal method for germinating seeds and an alternative way of growing plants will be to grow plants hydroponically. Hydroponics is a more hygienic and efficient process compared to soil -based growing. It also protects plants from root rot or insects.
