Heat recovery ventilation system in renovated house. A healthy home and a better night's sleep! Father and handyman Bjarke Skov did a part of the installation himself, when he invested in a residential ventilation plant from Dantherm, which now ensures his family a healthy home and a better night's sleep.

Cases: Residential Ventilation - Dantherm

Residential ventilation mainly differs from commercial and industrial ventilation in terms of the size of the heat exchanger involved. Residential air handling units tend to be less complex than non-residential ones and designed for ventilation of apartments, single or small multifamily houses. The airflow is usually limited up to 1.000 m3/h.
