The Christian Religion and Biotechnology: A Search for ...

The final section offers a theological interpretation of genetics and biotechnology, reflective of Christianity but intended for a wider readership. The article also looks at the question of the human embryo and its role in research, the theological implications of the technological transformation of the human self, and how we are to understand in religious terms our new role in creation.

Biotechnology and the Religion—Science Discussion - Oxford ...

A Christian Perspective on Biotechnology & Bioengineering "The rise of science was not an extension of classical learning. It was a natural outgrowth of Christian doctrine: nature exists because it was created by God." - Glenn T. Stanton (Stanton 2011)

A Christian Perspective on Biotechnology & Bioengineering ...

The project of technological advancement is not a recent development; its roots can be traced in the Middle Ages — and it is here also that the link between technology and religion develops. Technology came to be identified specifically with Christian transcendence of a sinful word and Christian redemption from a fallen human nature.

GM WATCH daily list 1.Is genetic engineering morally acceptable? 2.Biotechnology as religion QUOTES: 'The entire concept [of genetic engineering] nurtures the pride and arrogance of human nature. Scripturally speaking, man becomes like the Great Deceiver who said, "Ye shall be as gods" (Genesis 3:5).' - Pastor Raymond Davis Jr., Greater Corinthian Church of the Christ (item 1) 'Today, we ...

Is Genetic Engineering Morally Acceptable? Biotechnology ...

Religion has sometimes had a positive effect, often indirectly stimulating or even directly encouraging scientific research of the biological world. Similarly, biology has had a profound effect on religion, sometimes offering challenges that require believers to reassess basic theological assumptions.

Biology and Religion - Michigan State University

From the printing press to the radio to the Internet, advances in communication technology have almost always instigated rapid and profound changes in religious practice.
