The first artificial Earth satellite, Sputnik 1, was launched by the Soviet Union on October 4, 1957. The first human to go into space, Yuri Gagarin, was launched, again by the Soviet Union, for a one-orbit journey around Earth on April 12, 1961. Within 10 years of that first human flight, American astronauts walked on the surface of the Moon.

## **Space exploration - Major milestones | Britannica**

Scientists believe that exploring space and patterns in space can help give us an idea of the next major flood, tsunami, tornado and even earthquake. Although that may be a few years away, pursuing it as a goal could become one of the major benefits of space exploration.

## **4 Benefits of Space Exploration & Why It Is Important ...**

Space may be the final frontier, but it's an expensive one to explore. There are ample problems with which to contend here on Earth, and that leads some
